Cover letter

Dear Hiring Manager,

I am pleased to be applying for the Software Engineering Manager at Infarm.

The mission of Infarm and scope of your business looks very impressive and exciting: growing food just near by the consumer is just amazing. Opportunity to make the world better by shaping a new reality of food industry based on cutting edge technologies is exactly the opportunity I'm chasing right now. I consider work not only as a source of livelihood, but as part of my life and source of personal satisfaction in creation. It seems to me I can find this in Infarm, so I decided to apply to Software Engineering Manager position at Infarm just after watching all videos at your YouTube channel.

Having almost 12 years of IT background in both B2C and Operations of FMCG company dealing with project, service, application development and people management, I'm looking for new opportunities. For past several years I was focused on developing my people management skills in the same time with preserving all my technical skills, expertise and knowledge by keeping myself close to technical executive level. Solid management background and technical expertise make me a great candidate for this position. I would love to have an opportunity to share more details about my previous experience, answering your questions and learning more about this position.

Thank you for taking time to consider my credentials.

Respectfully,
Nikolai
