Cover letter

Dear Hiring Manager,

I am pleased to be applying for the Sr Manager, Software Development position at Servicenow.

Mission of Servicenow and scope of your business looks very exciting and attractive to me. Opportunity to contribute to “customer-at-the-core” products which located on the edge of technology and make world better is exactly the opportunity I’m chasing right now. I consider job not only as a source of livelihood, but mostly part of my life and source of personal satisfaction in creation. It seems to me I can find this in Servicenow. Considering mentioned above I decided to apply to Sr Manager, Software Development position.

Having almost 12 years of IT background in both B2C and Operations of FMCG company dealing with project, service (by the way, using servicenow) and people management, I'm looking for opportunities to get closer to the software development domain. Last period I was mostly focused on developing my people management skills. Meanwhile I do my best to preserve all my technical skills, expertise and knowledge by coding for personal pleasure and satisfaction. Solid management background and technical expertise make me a great candidate for this position. I would love to have an opportunity to share more details about my previous experience, answering your questions and learning more about this position.

Thank you for your consideration.

Best regards,
Nikolai
